

Construction & Civil Engineering

An Action-Fraction Challenge Workshop will identify the processes, actions and functions used in a project that if improved, will reduce over-run, lower risks and increase profits.

Challenges

- Unexpected project risks
- Pressure to increase margins
- Escalating costs
- Fewer opportunities
- Retained profits are reducing
- Low bids to secure contracts
- Many competitors for contracts

Solutions

Taking part in the Action-Fraction Challenge Workshop will benefit you in the following ways:

- Increase staff output
- Increase project profits
- Reduce operating costs
- Protect future revenue
- Reduce project risks
- Improve service quality
- Increase reputation
- Stop repeating the same costly mistakes

Why hold a Challenge Workshop?

Civil and infrastructure projects are complex with tight delivery schedules and potential issues in the supply chain to impact on overall performance. In most cases huge sums of revenue can be lost through taking additional risks in the bidding process, operational issues, strain from suppliers, tighter delivery schedules and delays on projects.

If by investing in the Challenge Workshop, your business could save even 1% of the cost of losses or delays involved across each project, what difference would that make to your yearly results?

What financial benefits could be gained from improving the way implementation and support staff function to make them more efficient?

Are you aware of the mistakes being repeated on each project?

The Challenge Workshop captures what went well and what could have been improved on a project to avoid repeating the same costly mistakes.

What is the Challenge Workshop?

Action-Fraction facilitates our Challenge Workshop in a productive, structured and engaging way. We will use activities and techniques to prompt constructive discussion around key areas such as communication, cost control, quality measures, and areas of risk and program delivery.

The key stakeholders present will investigate what went well, areas that did not go well, action impacts on the project, complexity to fix, root cause identification, improvement action plan and embedding learned lessons for future financial benefit.

Why should we use Action-Fraction?

Our trained facilitators have many years experience of designing and facilitating workshops that challenge the current status quo. We use proven techniques to ensure higher-quality outputs and decisions are arrived at. The actions from the workshop are then tangible and when implemented, will reap improvements to your future projects and business functions.
